

## HISPANIC SOCIETY MOTION

### **AGM Notes:**

Cultural societies make a valuable contribution to our student community and diversity, playing an important role in generating exchanges of traditions, peoples, and values.

### **AGM Believes:**

1. Societies should be able to have access to their bank accounts in order to maintain their role as valuable contributors within the student community.
2. No societies should economically rely on its committee members' money.

### **AGM Resolves:**

1. To make the process of societies being able to access their bank account easier and more accessible.
2. To make those societies with not access to their bank account have a more approachable and less bureaucratic access to AUSA's finance department and receive the money within a reasonable time and not in the end of the year.
